

## SUPPLY LIST

Dear Molalla Freshmen,

Throughout your time at Molalla High School you will have access to computer labs, the library and its many resources, science laboratories, Physical Education equipment, weight lifting equipment, and the auditorium for performance. Along with all of those locations, everyday you will have access to the Internet for academic purposes. The environment that Molalla High School can offer will help you be successful, but it will not be the only aspect that determines your success. Personal responsibility will play a large role in developing your thinking and understanding. It is important to note that we are placing a large emphasis on student organization. Our school requires all freshmen to maintain a 2-3" binder with dividers for each class, as well as a supply pouch stocked with writing utensils. The binder will be graded within Homeroom for neatness and organization. Below is a list of general supplies. Classes may have other specific supplies.

- Chromebook Computer\* (not required)
- Sticky notes
- Highlighters (2-3 colors if possible)
- Pens
- Pencils (mechanical or not)
- Paper (college ruled)
- Scientific calculator (math courses, check with your teacher if an electronic device APP is acceptable)
- Supply pouch
- Dividers (one for each course)
- Index cards
- 2-3" binder
- Molalla Library card (All students will be required to have a book of their choice in their possession during class and Homeroom time. Students can check out books in our library or the Molalla Public Library.)

Being prepared for any assignment that comes your way is the best way to grow! We look forward to preparing you for your future.

Sincerely,

Randy Dalton  
Principal

\*If you are looking to invest more in your child's education perhaps begin trying to set aside a little money if at all possible to save for a small laptop computer. More and more we live in an online environment and there are a tremendous amount of resources available. As a school I am doing what I can to add more and more technology but this will take time. Though not required by any stretch of the imagination, these computers can be a powerful researching and word processing tool both at school and at home. In addition, there are some excellent resources with our new math textbooks and curriculum. The most basic of chromebooks would work. A chromebook can cost anywhere from \$180 and up.
